Attorney Docket No. SOM920000002US1

REMARKS

The present application was filed on June 15, 2000 with claims 1-14. Claims 1-17 are

pending, and claims 1, 8, 12 and 15 are the pending independent claims.

In the outstanding Office Action dated July 1, 2004, the Examiner rejected claims 1-17 under

35 U.S.C. §103(a) as being unpatentable over U.S. Patent No. 6,164,975 to Weingarden et al.

(hereinafter "Weingarden") in view of U.S. Patent No. 6,732,331 to Alexander (hereinafter

"Alexander").

With regard to the rejection of claims 1-17 under 35 U.S.C. §103(a) as being unpatentable

over Weingarden in view of Alexander, Applicants have amended independent claims 1, 8, 12 and

15. Specifically independent claims 1, 8, 12 and 15 have been amended to recite that a profile

comprises a plurality of numeric entries, each numeric entry representing a learning mode. The

highest numeric entry of the profile is indicative of an optimum mode of learning. Support for the

amendments can be found on pages 3-5 of the specification. The combination of Weingarden and

Alexander fails to disclose a profile having a plurality of numeric entries that each represent an

individual learning mode. The combination also fails to disclose that the highest of these numeric

entries is indicative of an optimum learning mode.

Dependent claims 2-7, 9-11, 13, 14, 16 and 17 are patentable at least by virtue of their

dependency from independent claims 1, 8, 12 and 15, respectively. Dependent claims 2-7, 9-11, 13,

14, 16 and 17 also recite patentable subject matter in their own right.

In view of the above, Applicants believe that claims 1-17 are in condition for allowance, and

respectfully request withdrawal of the §103(a) rejection.

Respectfully submitted,

Date: October 28, 2004

Robert W. Griffith
